### Technical Notes

#### Consumer Price Index

is an indicator of the change in the average retail prices of a fixed basket of goods and services commonly purchased by households relative to a base year.

#### Inflation Rate

is the rate of change of the CPI expressed in percent. Inflation is interpreted in terms of declining purchasing power of money.

#### Purchasing Power of Peso

shows how much the peso in the base period is worth in the current period. It is computed as the reciprocal of the CPI for the period under review multiplied by 100.

#### Year-on-Year Inflation

refers to the comparison of change of one month to the same month of the previous year.

Note: The dataset used in the special release is exclusive for BARMM region and Lanao del Sur province.
